Sales by Country

- Total Profit: The **overall revenue volume** generated by the supply chain during the selected period. Tracks top-line growth.
- Total Sales: The **net financial return** from all orders. This is the primary measure for strategic profitability analysis across segments and products.
- Schedule Adherence %: The **reliability** metric: measures how often the operation meets or beats the promised shipping schedule. Indicates process predictability.
- Late Risk Percentage: The **rate** of orders flagged as being at risk of late delivery. This is the core operational health metric for proactive alerting.
- Avg Days to Ship (Real): The **average actual time** taken to deliver an order. Measures overall logistics speed and efficiency.
- Avg Orders per Region: The **geographic density** of demand. Highlights which operating regions are handling high or low volumes, informing resource allocation.

Total Sales Over Time

Operational performance & Status Analysis

Goal: Identify, visualize, quantify immediate logistics failures, risk exposures by tracking schedule adherence and delivery status trends.
